First major contest flying solo. First 15 meter opening, including 7 JAs in a row. Why didn't someone tell me how much fun this is? ... AA4YL.

Best condx for a WPX RTTY contest in several years. Welcome back sunspots! ... AA5AU.

MY FIRST CO WPX CONTEST, I WILL BE BACK AGAIN ... AD2TM.

I had a blast in this contest. The improved solar conditions made for a great time on 15 meters. As a little gun station, I'll take whatever solar help I can get. There were lots of new callsigns, both foreign and domestic, making their way into the log during this contest. No contacts were made on 10 meters, though I could hear some very weak RTTY on Saturday that my software couldn't quite decode. A quick complaint: I don't know how many times I had to correct someone to tell them that my callsign is AE5PW, not AE5P. I had to send AE5P an email to let him know that he is getting credit for alot of my QSOs! I blame this on the supercheck partial databases. Many stations got to endure my "my callsign is AE5PW AE5PW AE5PW AE5PW" macro, and even then they called me AE5P when they closed with me. They ended up NIL. The station here is a Yaesu FT950 with a Batternut HF9V ground-mounted vertical, running 100 watts. After each contest I am amazed at what such a simple setup can do, and this contest was no exception. Let's hope for more sunspots and a higher solar flux as the year goes on. ... AE5PW.

E-MAIL: AE9K@pkts.net 320 QSO points 115 Unique prefixes 36,800 total points ... AE9K.

Great Fun! ... AJ4CU.

This was fun. Had my personal best rate hour on RTTY - 135 QSOs! ... AK1W.

It's too bad my time was limited to operate this contest as conditions seemed outstanding. I was able to pick up a lot of DX prefixes with just 100 watts to a low wire antenna. ... AK9F.

My first contest in 3 years. Lots of fun. Thanks to all my contacts. I ran with 50w into a dipole strung up in my attic. ... KJ1J.

It was interesting to work single-band (40m) in a contest and try to make a valid go of it. Watching live scoring made an additional motivation. Also my first contest as a part of YCCC made me work for the team a little harder. ...

KK1X.

The big tower is still out of commission...waiting for a welder who isn't afraid of heights. Had a great time - it was nice to have some propagation for a change, but the window to Europe was fairly short up here in the Pacific Northwest. Backup station and antennas worked well, but should have the whole shooting match for upcoming contests...finally! Thanks for all those guys who jumped in giving out contacts - the second day there were plenty of guys with less than 20 Q's by the time they got to me. I appreciate it! Look for you all in upcoming tests;; I had a blast! ... KK7OO.

This was my first time on RTTY! ... KK9A.

Mostly S&P, with some running time. ... KL5E.

What a rollercoaster ride of RTTY fun!! Had some great propagation on 15 meters, some challenging propagation to Europe on 20 meters, some exciting contacts on 40 meters, all mixing together for an awesome RTTY weekend. My best score yet! Thanks for the contacts and to CQ for sponsoring the biggest fun RTTY weekend of the year. The bands were bursting with RTTY signals, wow! ... KL8DX.

This is a really fun contest! My time was interrupted this throughout the weekend, but next year I'll make a more concerted effort to block off the entire weekend for the contest! It's always good to see friends on the air! ... KO0Z.

I really enjoyed the contest! Thanks to all who worked me. ... KS0AA.

We did much better than last year because of the much better propagation. Thanks to Pauline KB1JXJ for keeping us well fed and to Gordon N1MGO for the use of his station. ... KT1I.

Decided to work on my 15m DXCC and have some fun. High point was working 6W2SC for a new one. Go Sunspots! ... KX7L.

TS 870 ALPHA 91 B Triband up 18 (JVP 36)(14,21 and 28 MHz) Dipole Rigid up 12 (Walmar)(7,14,21 and 28 MHz) ... L25X.

just to give mults, as long as the stupid 60 minutte rules in this contest I don't want to do this contest due health reason. Also when it changed down to 30 hours max! But the contest manager dont want to discuss this. ... LN5O.

I made mistake, sent several duplicated serial number. Good amount of activity over the weekend. Radio is K2, antenna is LW, thanks for the station who pick up my weak signal. ... MOCFW.

A most enjoyable contest, and will look forward to next years. This is my first entry into a CQ WW contest...maybe the first of many ... MOCNP.

rwtownsend@onetel.com ... MONQN.

Station: K3, 100 watts out, Steppir Biggir vertical 1/4 wave with elevated radials, microKeyerII and MixW2.19 Decided to use contest to test out performance on 40M and had a great time. Total operating time 26hrs 15 minutes.I'll be back next year. ... MOVAA.

Setup FT-1000mp into th7dx,40m monobander,80m vert's ... MIOM.

Brilliant fun. Great having 15m open in such good shape. ... MM0GPZ.

Terrific conditions, especially 15m. ... MM0RKT.

E-MAIL: nlao@arrl.net WAS NOT ABLE TO MAKE N1MM SOFTWARE WORK FOR RTTY SO HAD TO USE HRD WHICH IS NOT REALLY MADE TO DO CONTESTS. ... N1AO.

Murphy lives in my shack. ... N2EIK.

Twenty was very noisy the first day. Did not bother to even try to run. No 10M antenna and a rig that did not always want to work on 80M, hence only 35 QSO's there. 80 seemed a good place to be Sunday afternoon. Some nice DX found during the contest, always a bonus. Great to see 15 open. I think it was better on Saturday. It seemed to close earlier on Sunday or was that my imagination?

Thanks to all the guys and gals who heard my 100 watts and apologies to the guy I left on 80M mid QSO when the rig finally died on that band - weird FT 1000 MP intermitant. Most likely on the LPA board. Receives fine, just no output and only on 80 meters. The real plus was to be, once again, in a contest with the SFI above 90. FANTASTIC. Let's have more of that next weekend, please! ... N2FF. My best score yet! Thanks to all. ... N3JNX.

Great contest! ... N4FY.

Sure was a great contest! ... N5DRB.

First QRP effort from new QTH. ... N5WY.

E-MAIL: n6bhx@arrl.net MY 3RD RTTY CONTEST. I LIKE IT! ... N6BHX.

Tried to fight off a cold with Nyquil. Should have fought off the Nyquil. Got lots of sleep in between short boughts of operating. ... N6DW.

15 meters was hot, 31 countries on 10 meters - N6QQ ... N6QQ.

Great Contest ... N7ESU.

Great fun. Nice propagation compared to last few years. ... N8WXQ.

HAD A FEW THINGS TO DO ON SATURDAY AND MOST OF SUNDAY MORNING. GOT ON SUNDAY AROUND NOON AND 20M WAS WIDE OPEN SO I STAYED. WAS SURPRISED THAT I COULD KEEP A FREQ RUNNING 90W FSK WITH MY NEWLY AQUIRED OMNI VII & TRIBANDER. LOOKING FORWARD TO THE NEXT CQ RTTY TEST. TNX FOR THE QSO's ... N8XI.

227 CONTACTS 169 MULTIPLIERS ... N9UY.

Our first effort as a multi operator in this contest - had a ball despite a rare six inch snowfall the first night. With fairly decent band conditions we managed over 1800 QSO's and hope to do better next year. ... NC4CS.

Please note because of operator error the starting serial number on 40M was 032 not 001. ... NK7U.

Great Contest, Amp died at 12 hours in, so I bagged it at that point... ... NK7Z.

As always, I wish there was a QRP category. I missed the first couple hours, and had some other plans for the weekend, so I decided to do a Single Band effort to free up some time. Hopefully the sunspots attracted all the other single-banders to 15m - leaving 40m to me! I started the contest by going to sleep, so I could get up at 1AM local (09z) and work JA's and Pacific. This worked well, with 50 in the log in my first hour. I stayed up another hour, then caught another nap until a hour before sunrise for some more 40m contacts. Then I had to sit out daylight until an hour before sunset (00z) when I could start working Europeans and USA. I finally ran out of new workable stations at 05z, so did the 1AM and

sunrise shifts again. Finally the last hour brought a few more USA. I operated a total about 12 Hrs. I was pleased to make a score above last year's USA SB40m LP winner, but we'll see how others did. A few problems with people who call and call and never listen, and a couple who said we "WORKED B4" - Huh?, I'd call again and say "not in log, qso pse" but they'd ignore me, say DUPE, or move off. Shucks, why not just work me again! Overall, the high level of activity was pleasing, and made this a fun RTTY contest. Thanks! NN7SS (op K6UFO) 40m: Force 12 Delta 240 at 78ft 40m: Cushcraft 40-2CD at 48 ft. Yaesu FT-1000MP 100 watts. Writelog and MMTTY software. ... NN7SS.

Wow! The upcomin suncycle looks promising. 15m was a real blast with good
openings both to JA and W. Can't wait for it to get even better. This was my 4th
RY contest ever. Went to SK6AW's contest container on saturday morning, just to
find out why I've been having trouble with the FSK connection on the TS-850
earlier. Previous owner must have hit it so it was not connecting to the PCB.
Re-soldered it and was QRV for about 26 hours total, using "High Power" of ~400
watts. Shared antennas with SM6V, Chris who worked PACC during saturday
afternoon, and took a one hour break to work a domestic contest on sunday. Much
fun! 99% run and just a few QSO's S&P. Thanks to everyone for calling! 73 de

many (mostly U.S.) stations do not understand that their transmissions have to
be evaluated by a computer; they do not send DE callsign so the computer can not
find the caller's ID; they do not send 599 so t he computer can not locate the
serial number; they do not enclose the ir call in white space so it does not
know where the call ends and QRM begins. This all requires manual work and puts
the U.S.-stations a t the end of the wait line in pile-ups. ... V31GW.

73! ... YO2GL.

Was glad to run my first CQ WPX RTTY contest...after three decades of classic RTTY traffic ! Enjoyed the excelent TTY facilities of the IC-7000 and MMTTY combination. 73 Szigy. RIG: IC-7000, 100 W; ANTENNA: GP-14,21,28 MHz, H.M. ... YO2IS.

Nice contest! Thank you. ... YO3GW.

thanks for "good" ears ! ... YO3JW.

THIS IS MY FIRST WPX RTTY CONTEST! VY NICE! ... YO4AAC.

TRCV ICOM 706, ANT INV, SOFT MIXW REG, PC ACER ASPIRE 3000 ... YO4BTB.

73 de Romeo ... YO4RST.

Radio: ICOM IC-706 Antenas: HF9V , Dipol 80-40m Contest Program Mix2 Computer: Leptop-FUJITSU-Siemens Thanks for a nice contest! I will be back next year. ... YO5BYV.

Many station tnx to all ,very good propagation in 20m,73 GL ... YO5OHY.

Rig: IC-706MKIIG Ant: dipole Soft: Ubuntu-9.10 + Fldigi-3.11.4 ... YO5OLD.

FT 950 ANT VERTICAL ... YO7LGI.

60 W in digimode ... YO9CWY.

Nice condx on 15 m band. Unfortunately on Saturday afternoon, the SWR of my high-band antenna (the 17 el Optibeam) went sky high (balun failure ??!!), so I had to to continue the contest with the the smaller antennas. Thanks everybody for calling me and for the points. 73, Alex YO9HP ... YO9HP.

RIG TS 2000X ANT DIPOLE The condition were good Tnx for the org. of CQ-WPX-RTTY Contest ... YO9XC.

HW 101 + Dipol antenna ... YP2W.

Rig: Yaesu FT-920 Antenna: Butternut HF-9V vertical on ground ... YP5Z.

FT - 897 + PA 300W HM SPIDERBEAM 14/21/28 ... YR5T.

IC-746 S PWR 100 W ANT DIPOLE ... YU0W.

Very nice contest ! ... YU1BFG.

Poor Condx into NA , here!! PACC Contest put out many RTTY active PA stations. ... YU7AU.

E-MAIL: vcuesta@intercable.net.ve ... YW4V.

Thanks to all concerned in running the contest ... ZC4LI.

A casual entry this year - still learning how to drive N1MM and MMTTY. Spent quite a bit of time hunting the WWW in vain for suitable message files to import into N1MM (seems I will have to publish mine!). Apologies for messing up the odd exchange. N1MM's Enter-Sends-Message mode is particular about getting the right info entered in the right sequence, but my fingers don't always play ball. Took

several breaks to feed an orphan lamb rescued from the forest on Sunday. Such is the life of a ZL contester. ... ZM4G.
